**DISC-FX**

**Minimally Invasive Discectomy System  
Hands-On Workshop**

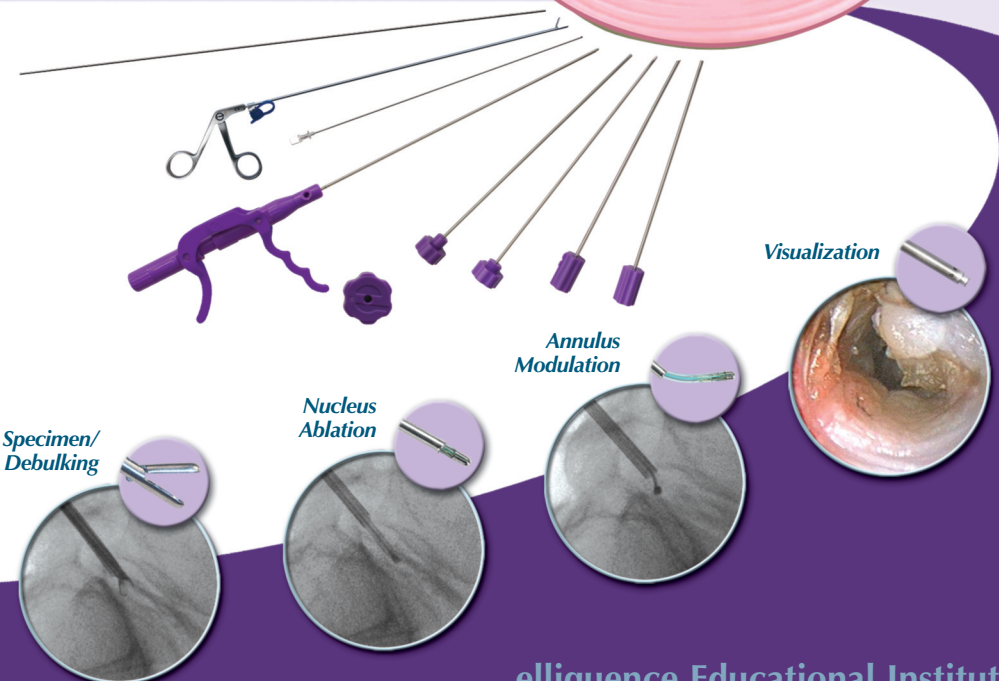

February 11, 2017

April 8, 2017

June 10, 2017

September 16, 2017

December 2, 2017

## WORKSHOP OVERVIEW

*This workshop is designed for the practicing spine surgeon, neurosurgeon or interventional pain management doctor interested in minimally invasive lumbar spine techniques and procedures. Participants should already possess the understanding of spine anatomy as well as skills required for intradiscal needle placement.*

*Workshops will be limited in attendance to ensure maximum hands-on during cadaveric instruction.*

## EDUCATIONAL OBJECTIVES

- Discuss minimally invasive spine procedure options
- Understand the patient indications and contraindications for using Disc-FX®
- Present multi-center clinical investigation results
- Demonstrate correct access into the disc space when using Disc-FX®
- Understand nucleus ablation and annulus modulation
- Perform a procedure using Disc-FX® on a cadaver specimen

## AGENDA HIGHLIGHTS

Characteristics of Radiowave Technology  
Anatomy  
Pathoetiology of Discal Diseases  
Disc-FX® Overview  
Disc-FX® Feasibility Outcome Study  
Q&A / Discussions

Hands-On Sessions:

- Needle Placement / Discography
- Disc-FX® Application
- Intradiscal Techniques
- Nucleus Ablation
- Annulus Modulation
- Visualization

## CLINICAL FACULTY

**AJ Rastogi, MD**  
Medical Director and Co-Founder of North American Spine & Pain

**Stefan Hellinger, MD**  
Director Medical Research Institute, Isar Kliniken, Munich, Germany

**Corey W. Hunter, MD**  
Medical Director and Founder of The Ainsworth Institute

## Multiple Treatment Options in One System

### 1 Nucleus Decompression/Discectomy

### 2 Nucleus Ablation

### 3 Annulus Modulation

### 4 Visualization
