

Trigger·Flex® Pro

elligence is excited to unveil the next groundbreaking evolution in the Trigger-Flex® Family: the Trigger-Flex® Pro! This enhanced handpiece takes precision to the next level, boasting a newly designed ergonomic hybrid grip for unmatched usability, versatility, and comfort. The restructured shaft of the Trigger-Flex® Pro delivers superior strength, perfectly balancing durability and flexibility for optimal performance in surgery. Engineered to be compatible with all elligence working channel scopes, the Trigger-Flex® Pro, when paired with the Surgi-Max® Ultra, sets a new standard for surgical precision.

Advantages of the Trigger-Flex® Pro

- 1 More pronounced upper “Shark-Fin” finger grip for a more secure hold when inverted.
- 2 Enhanced strength on the shaft. A perfect pairing of durability and flexibility. 33cm in length.
- 3 The Hybrid Grip – A combination of previous Trigger-Flex® Handles (“U” Handle and “3 Finger” Handle) has been combined for optimized ergonomics.
- 4 Expanded handle offers more control with 4 finger positions.
- 5 Rear of handle is wider and contoured to fit into the palm of your hand.
- 6 Tailored for use with all elligence working channel endoscopes.
- 7 Trigger-Flex® Pro combined with the Surgi-Max® Ultra provides unparalleled surgical precision at a much lower temperature allowing it to gently target tissue with minimal damage to surrounding healthy tissue.

Product Information

Product Code: DTF-32

Working Length: 330mm
